PROJECTS

Online Restaurant | Html 5, CSS ,Javascript

➢ A user friendly website with responsive behaviour and HTML elements to structure the content logically with multiple pages.

➢ Apply CSS styles to replicate the visual appearance of the original site.

➢ Use CSS techniques such as Flexbox, and media queries for responsive design.

➢ Add interactivity and dynamic behavior using JavaScript.

➢ Implement features such as bottom to top menus, sliders, tabs, form validation,etc., to match the functionality of the originally site.

Online-Music | Html 5 , CS

➢ Develop a web or mobile application that closely resembles the Spotify UI, allowing users to browse music catalogs, search for songs, create playlists, and control playback.

➢ Design an intuitive and visually appealing user interface that resembles Spotify's design language.

➢ UI components and layouts that closely resemble the Spotify interface, including typography, colors, icons, and spacing.

➢ Focus on providing an intuitive and seamless user experience, with clear navigation, smooth transitions, and feedback for user interactions.

Portfolio | Html 5,Tailwind CSS ,JavaScript

➢ Develop a personal website that highlighting my skills, projects, education, work experience, and achievements.

➢ About Me section, Portfolio showcasing projects, Resume/CV download, Contact form, Blog(optional).

➢ Design a clean, professional, and visually appealing user interface that reflects my personal brand and style.

To Do App | Html , CSS , React JS

➢ The To-Do App is a web-based application designed to help users manage their tasks efficiently. It will allow users to create, view, edit, and delete tasks

➢ Add Task: Users can input a task description and add it to their to-do list.
View Tasks: Users can see a list of all their tasks, including details like creation date and completion status.
Edit Task: Users can update the description of existing tasks.
Delete Task: Users can remove tasks from the list.
Mark as Completed: Users can mark tasks as completed, which will visually differentiate them from pending tasks.

➢ Responsive Design: The app will be responsive, ensuring a smooth experience on various devices (desktops, tablets, smartphones).

➢ Persistent Data: Tasks will be saved in the browser's local storage, so users don't lose their data when they refresh the page.

➢ Keyboard Navigation: Ensure that users can navigate the app using keyboard shortcuts.
